THE KAMA STORY

KAMA's journey began in 1985 as a small, one-person operation working from the back of a workshop, with the launch of the Banshee range as its first product line. Built on determination, technical expertise, and an uncompromising commitment to quality, the foundation was set for what would become a respected name in the industry.

In 1997, following the merger of two established businesses, KAMA Industries was formally founded. The company initially focused on the manufacture of audible and visual signalling devices, as well as specialised flameproof equipment for demanding industrial environments.

In response to market demand and through close collaboration with its distribution partners, KAMA expanded into the design and manufacture of custom-engineered units produced under supplier brands. This strategic growth led to the development of a broader portfolio, with a strong focus on electro-mechanical products.

Today, KAMA provides comprehensive turnkey solutions for complex design and manufacturing projects. From initial concept development and detailed design, through to precision manufacturing and final delivery, all processes are executed in accordance with internationally recognised ISO 9001 quality management standards

QUALITY PROMISE

At KAMA, we are dedicated to delivering exceptional value to our customers through high-quality products, innovative solutions, and operational excellence. We apply proactive design-thinking and customer-centric principles across all our processes, ensuring that every project is tailored to meet the unique needs of our clients.

Each product undergoes rigorous quality control inspections, adhering to internationally recognised standards, to guarantee performance, reliability, and consistency. Our commitment to excellence ensures that every solution we provide reflects KAMA's reputation for precision, integrity, and world-class quality

MISSION

KAMA's mission is to deliver exceptional design and manufacturing solutions through the seamless integration of innovation, technical expertise, human-centred design, and responsible environmental practices. We are committed to creating value for our clients by transforming ideas into high-quality, reliable products that meet real-world needs with precision and integrity.

VISION

Our vision is to be a leading global manufacturing partner, recognised for trusted end-to-end product development and production excellence. We strive to set the benchmark in engineering innovation, operational efficiency, and design quality, building a reputation founded on reliability, performance, and the value we consistently deliver to our customers.

OUR OFFER OF VALUE

DESIGN

DEVELOP

MANUFACTURE

We provide a comprehensive turnkey solution, delivering end-to-end design and manufacturing services. Whether developing a new concept or improving an existing product, we manage every stage – from initial design and engineering through to final production – ensuring a fully finished, market-ready solution for our customers.

DESIGN

When starting a new project, the first crucial step is to conceptualise your idea. KAMA provides expert guidance throughout this process, helping to shape and refine your vision with:

- Product concepts.
- Detailed design drawings.
- Creative, out-of-the-box ideation sessions.

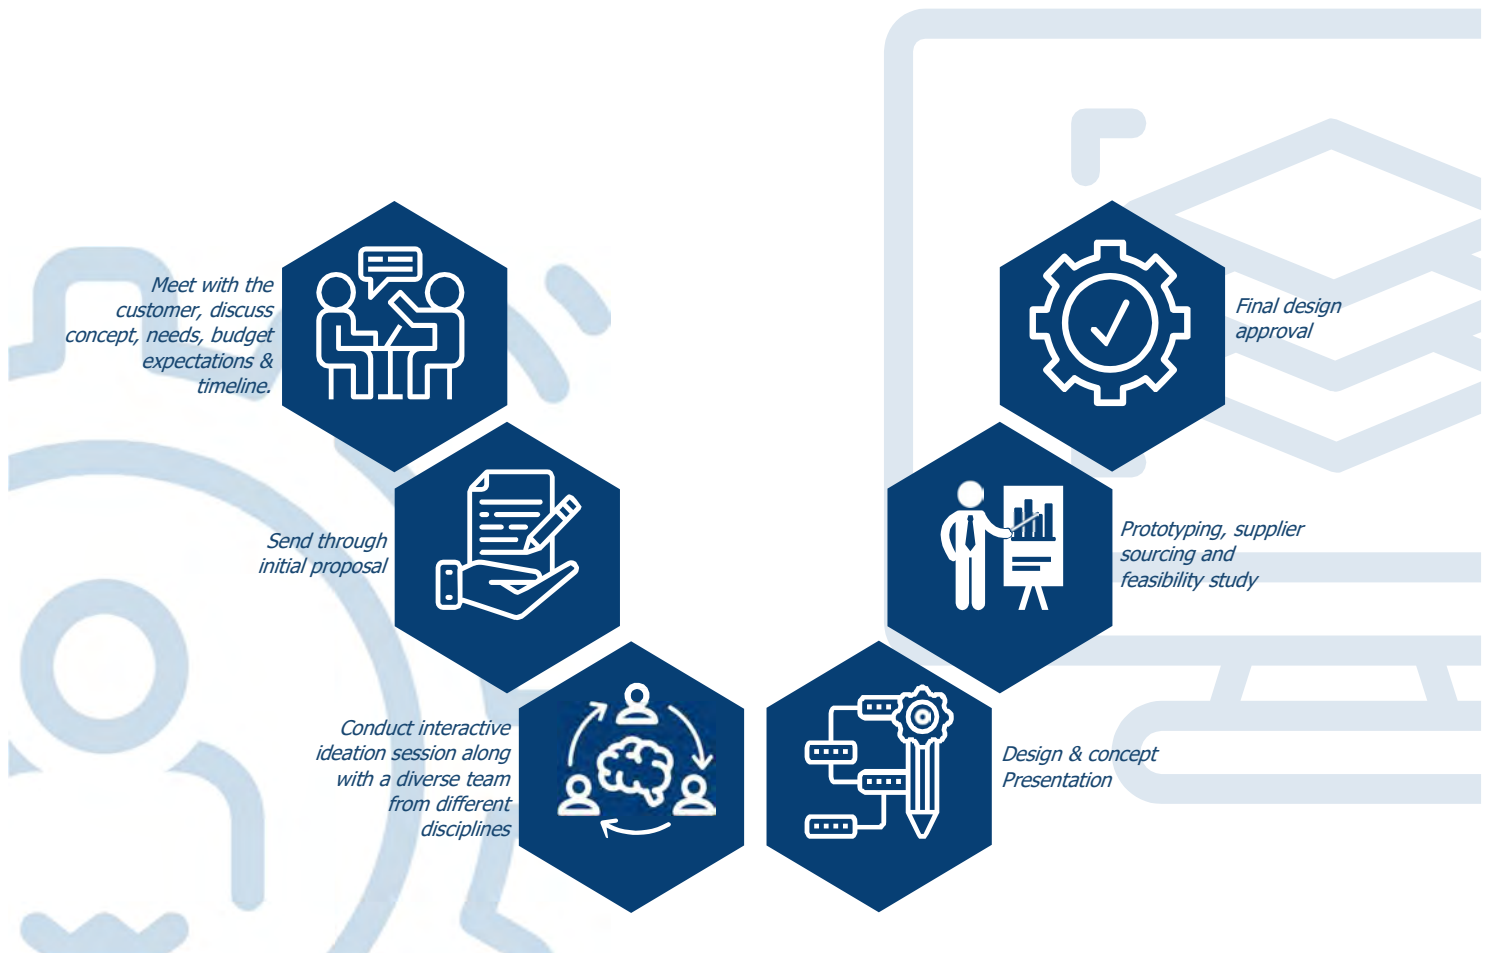

We facilitate the entire creative process — generating, analysing, and communicating ideas — ensuring that each concept, whether visual, tangible, or abstract, is fully explored and developed. This approach lays a strong foundation for innovative, practical, and high-quality product solutions.

DEVELOP

Once your idea has been conceptualised, the next critical step is to test and develop it into a viable, working product. KAMA provides guidance throughout the development process, supporting you with:

- Product prototypes.
- Supplier engagement and management.
- Feasibility assessments and costing.
- Optimised manufacturing processes.

We create a comprehensive plan and detailed specifications that map out the entire development process, ensuring that new or improved products are both practical and ready for production, while meeting the highest standards of quality and efficiency.

MANUFACTURE

Once your concept has been fully developed and the design and supply chain established, the final stage is manufacturing. KAMA manages the entire production process from start to finish, ensuring precision, consistency, and uncompromising quality. Every unit is produced to meet your exact specifications, resulting in a reliable, market-ready solution.

As part of our comprehensive turnkey offering, we deliver fully finished products ready for distribution. Our capabilities include:

- Sourcing high-quality raw materials
- Machining, casting, plating, and assembling components
- Implementing rigorous quality control throughout production
- Professional packaging and labelling for distribution

Through this integrated approach, KAMA ensures a seamless transition from production to market, delivering products that reflect durability, performance, and operational excellence.
